BenBen 2032

A VISION, NOT A RESULT

Every robot, phone and camera feeds one memory of a place. **Nothing is called fixed until it’s seen fixed.**

01 PERCEPTION CASCADE · PLACE MEMORY

TIER 0 — FREE

Is this view usable? Did the place change?

IMAGE QUALITY · POSE · LIDAR GEOMETRY CHANGE · WORKS IN THE DARK

TIER 1 — LOCAL

What changed?

META OPEN WEIGHTS, ON THE DEVICE

Muse Spark Open* or similar* · SAM 2.1 · V-JEPA 2 or Perception Encoder: keyframes*

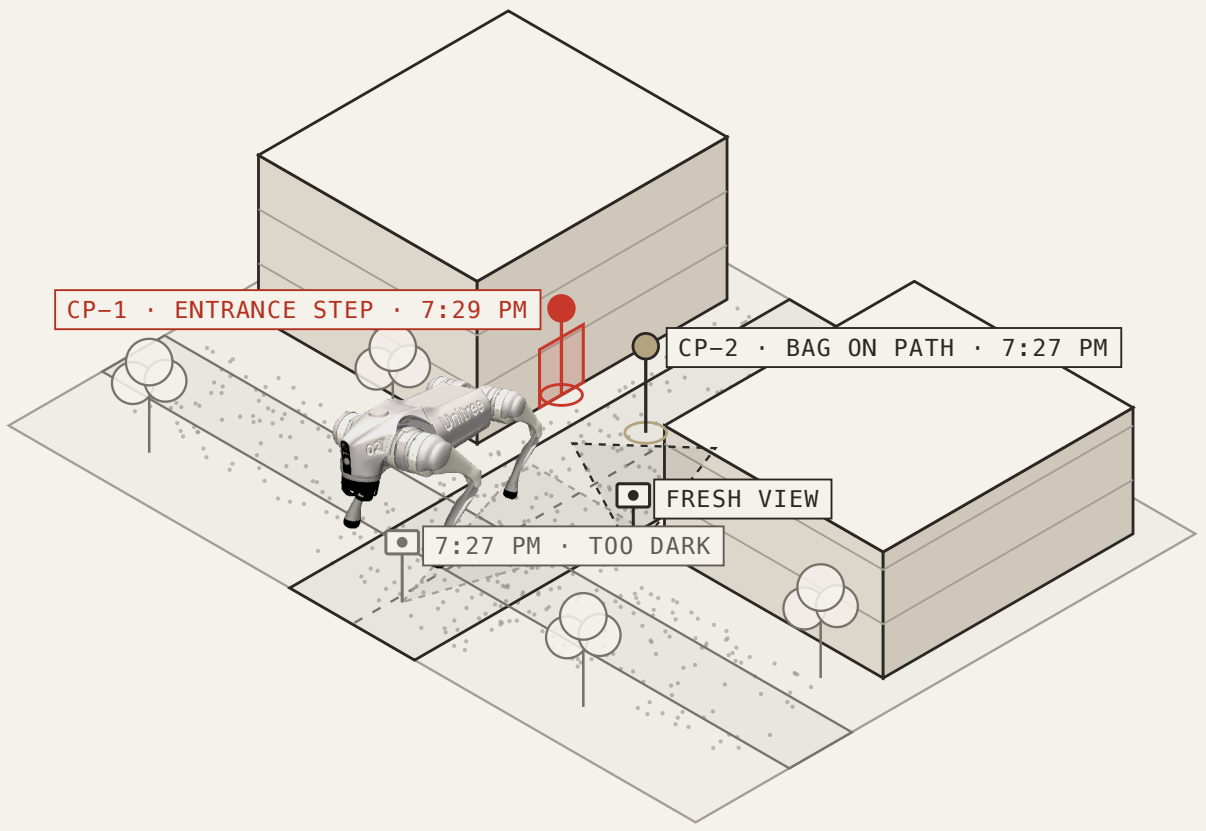

TIER 2 — API

Is it a barrier? What’s the evidence?

MUSE SPARK + SAM 3.1 · JUDGE AND CITE

EVERY FRAME
FRAMES THAT CHANGED
THE FEW WORTH A CALL

ONE ROUTE, EVERY SOURCE

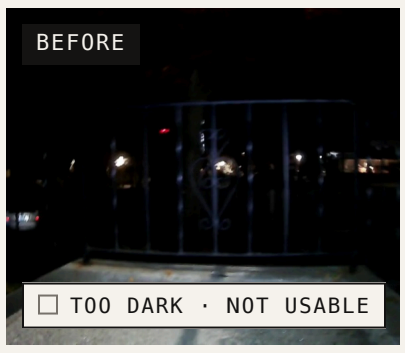

SCHEMATIC · ANCHORS PLACED BY HAND

ROBOT: UNITREE GO2 MODEL RENDER

02 ONE CHECKPOINT ACROSS VISITS

VISIT 1 · ROBOT	VISIT 2 · PHONE	VISIT 3 · ROBOT	VISIT 4 · CAMERA
Clear	**Blocked**	**Too dark**	**Cleared**
USABLE · CLEAR	USABLE · **BLOCKED**	NOT USABLE · **STAYS BLOCKED**	USABLE · CLEARED

Latest usable observation wins. Observations are append-only. A dark frame or an empty detection never clears an issue.

7:27 PM · TOO DARK — FRESH VIEW · SAM BOX

Real Nov 4 frames, arranged to show the evidence card.

03 HOW IT SCALES

AUTONOMY, SAFELY

Patrol a fixed route, not the open world.

- Fixed-route checkpoint patrol
- Deterministic motion guard
- Human remote override, always

A navigation policy is promoted **only if it beats replay and sim.**

No text-to-motor

SCALE

Verified access states, fed to routing apps.

Estates · Campuses · Hospitals

Verified access state
per checkpoint, with its evidence

Routing apps
Emerald Path-style step-free routing

GUARDRAILS

People see the evidence before anything happens.

- **Privacy** — Blur people before anything is stored or shared.
- **Human review** — A person approves every external action.
- **Evidence trail** — Every state links to the frames behind it.

WHAT WE’D MEASURE

Named, not yet measured.

Missed changes · False clears · Citation validity · Time to verified fix · Duplicate actions

Meta stack Muse Spark · SAM 3.1 · MapAnything · Voice Transcribe · `github.com/shivraj-S-bhatti/benben`

● ran Nov 4 ◐ wired, tested offline ○ roadmap
