A robot dog that checks if the route is passable.

Six behaviours of **the architecture we're building**.

UNITREE GO2 · OFFICIAL MODEL RENDER

> **"I got injured and ended up in a wheelchair … I had no idea if my route to the bus was even passable."**
>
> SHIVRAJ, WHO BUILT BENBEN

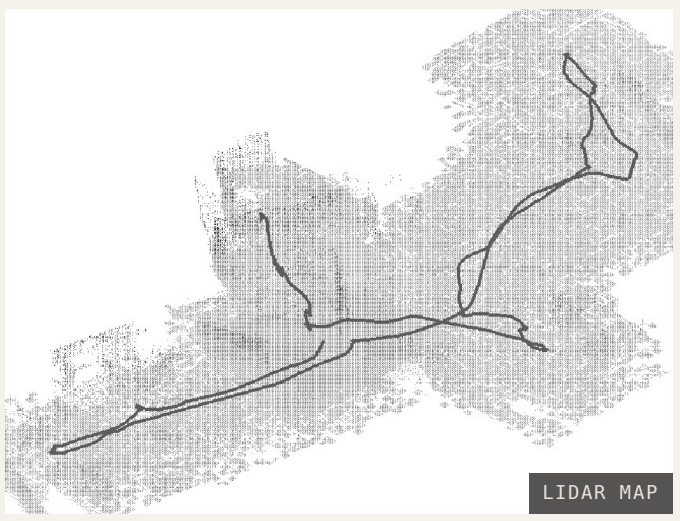

TODAY, OWNERS

learn about barriers from whoever couldn't pass.

TODAY, ROUTING APPS

run on map data that can be years old.

01 HOW IT BEHAVES

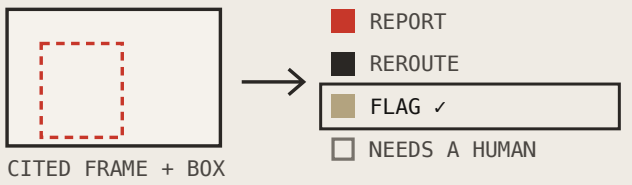

01 Notices change

Geometry decides when to look. Vision decides what it is.

02 Judges with evidence

One action, an outlined object and a cited frame.

03 Won't clear in the dark

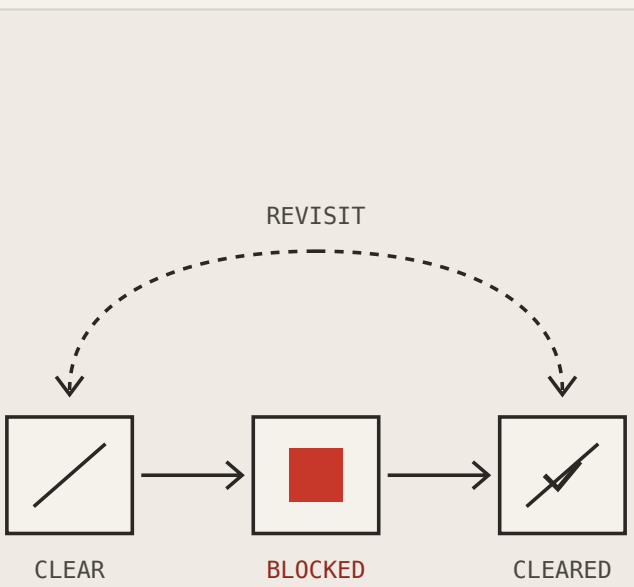

The latest **usable** view wins.

04 Asks one question

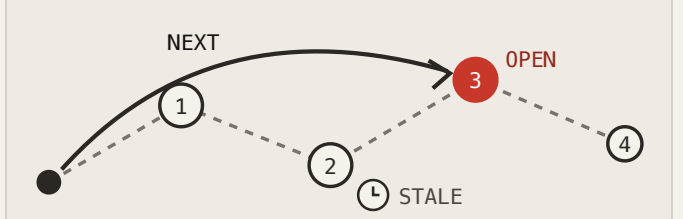

When unsure, one question a person answers with a tap.

05 Goes back to look

An issue stays open until a fresh view clears it.

06 Plans its next look

A reasoner picks the next stop from open issues and stale checkpoints.
